

Creating Tracking, Visibility, and Inventory Control Throughout Production with **SAP® Business One**

Before: Challenges and Opportunities

- Manually tracking inventory and billing was time consuming
- Manually tracking raw material and production numbers could be inaccurate
- Continually needing to ask for help and wait for information when questions arose
- Installation of another solution had failed, and time was running out
- Client's IT Department had been left without implementation support
- Poor training and documentation for operating the failed system solution

Why SAP and LBSi

- LBSi provided a superior system solution, working as a team with the client's IT Department and supporting users for successful implementation and productive training.

After: Value-Driven Results

- Information is now gathered in half the time
- Inventory is traceable, visible in the system throughout production, and controlled
- There is assurance that the right amount of material is available to create required amount of finished product
- Coordination is easy across many different products, teams, and departments
- Convenient tracking and reporting n Increased confidence in ability to easily use, and trust, the new system

"SAP Business One is a one-stop shop and my team is able to find multiple points of information. **When using Business One, everything you need is in one place."**

- Bob Jenkins, Production Planning
