SAP® Business One cooks up success for proBAKE

Before: Challenges and Opportunites

- proBAKE was using a legacy software system to manage its finances and back-end business processes, but the software was no longer supported and was limited in functionality.
- proBAKE wanted a way to link its inventory to orders and have one seamless system that could automatically create and email invoices.

Why SAP and LBSi

- SAP Business One met proBAKE's business requirements and the SME offering was ideal for its size.
- LBSI was selected for its expertise in SAP, first-class customer service, and tailored software solutions in manufacturing and material planning, warehouse management and shipping integration.

After: Value-Driven Results

- It's much quicker and simpler for proBAKE to run reports and complete everyday tasks, like invoicing.
 The team can also have several screens open to jump between accounts receivables and general ledger, for instance and get an overview of open orders and their status at any time.
- proBAKE now has visibility and control over its stock inventory, so the business can be more agile and respond to orders quickly and accurately.
- Shipping goods is a lot easier invoices are automatically calculated and include the UPS charge, proBAKE's handling charge and the correct insurance cover and can be tracked in SAP.
- The new credit card payments system ensures the business is PCI-compliant at all times.

"SAP Business One helps us work more efficiently. It's given us the tools we need to better manage our finances, inventory and sales, so we can grow the business."

-Nicki Esposito-Wallace, President, proBAKE
