

# Bringing fragmented systems together to simplify operations enterprise-wide with **SAP® Business One**

## Before: Challenges and Opportunities

- Lack of communication between multiple stand-alone systems and processes
- No centralized, standard CRM system
- Manual order processing causing errors
- Employee time wasted with inefficiencies

## Why SAP and LBSi

- LBSi provided the insight and experience to implement comprehensive system-wide improvement to critical data based upon deep experience within manufacturing businesses and SAP® Business One product expertise.

## After: Value-Driven Results

- Real time visibility into operations
- Personnel can be proactive vs. reactive
- Ability to forecast demand, anticipate and monitor workload
- Lower stress levels, improved morale

“You can **talk to any one of their guys instantaneously**, versus putting a ticket in the queue and waiting for a call back. If something was of urgency, we would get **instant reaction** to it.”

-Dan Meraz
